The prior art also does not teach a coil spring which pushes a ball of the ball guide toward the ball guide part using an elastic force or a second snap ring engaged to a tapered end part of the swiveling shaft, with a that is proportional to the taper part of the shaft and a snap ring for the tilting bracket with a snap ring accommodating part. The prior art also does not teach wherein there is a second snap ring engaged to an end part of

the swiveling shaft, wherein the end part of the swiveling shaft is a taper part, wherein the second snap ring engages the swiveling shaft at the taper part, and the second snap ring bears on the swiveling bracket and forces the swiveling bracket toward the swiveling support bracket with a force that is proportional to a taper of the taper part.
